

Blueberry Surefire Growth Mix

Makes growing blueberries possible no matter what your soil is like!

- Great media for patio containers and container gardening
- Best if used in raised beds
- Improves soil structure
- Improves aeration
- Acidifies soil
- Helps plants in clay soil

USE ON:

Blueberries, Hydrangeas, Azaleas and any other acid-loving plants, shrubs.

DIRECTIONS FOR USE

Blueberry Surefire Growth Mix works best if you plant your blueberry plants directly into the mix. You can do this either in patio containers or similar pots or in raised beds. If you have existing plants, it would be best to replant them into the mixture. If this is not possible, you will still get some benefit by mixing in the soil or using as mulch.

New Plants

In containers:

- Use Blueberry Surefire Growth Mix as a planting mix for your plants in containers
- No other amendment is needed

In raised beds:

- When building your raised beds, you should make them 8" deep.
- Width and length will depend on the type and number of plants you will be putting in the beds
- Each bag of Blueberry Surefire Growth Mix will fill approximately 1 cubic foot of container.
- Fertilize your blueberry plants with an acid blend of fertilizer approximately 6 months after planting and add more mix as mulch over the bed itself.
- Remember that blueberries require a consistent soil moisture, so incorporating an irrigation kit would be beneficial.
- See your plants growing instructions to get moisture and spacing requirements

Existing Plants

Incorporate into soil:

- Either dig out the top 4 to 6" of soil around your plants and fill back in with the mix or,
- Mix into the top layer of soil (4-6") at a ratio of approximately 50:50
- Use some as a mulch over top of plant and soil

As mulch:

- Can be used as a mulch for established plants and beds
- Layer the Blueberry Surefire Growth Mix 1" to 4" thick on beds and gardens
- Re-apply each year for best results
- Circle acid loving shrubs with a 1" to 4" thick layer
- Will provide weed control as well as humus and nutrients for your soil and plants

Net Content: 20 lbs.
