#1367  
Made in China

### Instructions

Internal rims ensure tubs stay upright while filling with growing media of your choice. For best results, moisten media before planting and fill each tub 1½-2" from the top.

Begin assembly by placing the largest tub in its permanent location. Fill with soil media. Next, place the medium tub in the center of the already filled large tub. Fill the medium tub with soil media and then place the small tub on top of that and then fill. You will be stacking tubs on top of one another with the largest tub on the bottom and the smallest on top creating a tower. After the tubs are stacked, begin placing plants into exposed soil media.

After adding plants to your stacked tubs, scratch an all-natural fertilizer into the surface of the soil media. Water thoroughly making certain water is reaching the bottom of the stacked tubs. Because Grow Tub® Tiered Strawberry Planter is made with porous material, there's no such thing as too much water! Planter can be placed directly into existing garden beds or on decks, porches or patios.

# GROW TUB®

## Tiered Strawberry Planter

- Three stackable tubs create ample growing space
- Wire rimmed tubs hold their shape, making it easy to fill with soil and creating an attractive display
- Ideal for limited garden space—great for decks, porches, patios or as additions to gardens
- Elevated plants make them easier to harvest—typically no weeding required
- Create an instant garden for strawberries, herbs or vegetables
- Holds 25+ plants
- Made from heavy duty, non-woven geotextiles with reinforced seams

Small: 20 x 8", Medium: 28 x 8", Large: 36 x 8"
