

# GROW TUB®

15 gallon

15 ¾" x 15 ¾" x 14 ½"

Holds approximately 80 quarts of soil media

Designed by Horticulturalists at Gardens Alive!®

#1814  
Made in China

## Instructions

Ensure sides of tub stay upright while filling with growing media of your choice. For best results, fill to 1½–2" from top of tub. Moisten media before planting. After filling tub with plants, scratch an all-natural fertilizer into the surface of the soil. Water thoroughly, making certain water is reaching the bottom of the tub. Because the Grow Tub® is made with porous material, there's no such thing as too much water!

Some plants may require staking, i.e. tomatoes and grapes. Install your favorite stake or cage directly into the tub.

Once the season is over, remove growing media and allow the tub to dry. Simply fold and store for winter—Grow Tub® can be reused for several years! Depending on your grow zone, you may want to overwinter your perennial plantings in an unheated garage or other protective structure.

Grow Tub® can be placed directly into existing gardens and beds, but is ideally suited for apartment balconies, decks, porches or patios.

# GROW TUB®

15 Gallon

**Ideal for: tomatoes, cucumbers, tomatillos, peas, beans, grapes and other small fruits**

- Create an instant garden—great for apartment balconies, decks, porches or patios
- Elevated plants are easier to harvest—typically no weeding required
- For smaller plants, multiples can be planted in a single tub
- Once season is over, simply remove contents and fold flat for easy storage
- Made from heavy-duty, non-woven geotextiles with reinforced seams and two handles for easy repositioning

15 gal. • 15¾" x 15¾" x 14½"

# GROW TUB®

10 gallon

13 ¼" x 13 ¼" x 14 ½"

Holds approximately 64 quarts of soil media
