

Transplant Care Nutrient Mix

Specially formulated mixture of fertilizers, beneficial bacteria and fungi that will ensure your transplants get off to the right start.

- Increases root growth and increases stress tolerance.
- Contains nutrient to aid in microbe proliferation as well as increase plant growth.
- Increases nutrient uptake.
- Natural fertilizers to boost growth.
- Improves poor soil conditions for more successful transplanting.
- In addition for use on tree and shrub transplants, can also be used on houseplant, flower, and vegetable transplants.

Directions

For transplanting larger containers or direct transplants:

- Use at a rate of 1-2 tablespoons per container or transplant. Incorporate in the soil and moisten to activate the beneficial microbes.

For transplanting 4-6" pots:

- Apply 1 teaspoon of Transplant Care Nutrient Mix. Incorporate in the soil and moisten to activate the beneficial microbes.

Transplant Care Nutrient Mix

3-1-1

Guaranteed Analysis

Total Nitrogen(N).....	3%
Available Phosphate(P ₂ O ₅).....	1%
Soluble Potash(K ₂ O).....	1%
