FIRST AID	
IF INHALED	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice.
IF ON SKIN OR CLOTHING	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
IF IN EYES	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
IF SWALLOWED	<ul style="list-style-type: none"> • Call a poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.

Precautionary Statements

This product is formulated from naturally extracted plant seed oil for use in controlling plant pests and is not intended for human consumption; please do not drink or eat this product or diluted mixture. Avoid inhalation and avoid eye contact. It is prudent to avoid letting the spray drift onto people or other non-target animals, plants, or sites. Avoid spraying during high winds so as to avoid drift.

ENVIRONMENTAL HAZARDS: It is prudent to avoid application of this product directly to pond or stream water. Rinse water should not be allowed to enter waterways, wetlands, or other ecologically sensitive areas. Do not rinse, spray, or dip pets with this product.

STORAGE AND DISPOSAL

Storage: Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals.

Disposal:

If empty: Do not reuse this container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Oil-Away™ Insecticide

Oil-Away™ Insecticide is a vegetable oil made exclusively from renewable resources produced in the United States. After Oil-Away™ Insecticide dries, it will not harm beneficial insects.

Directions for Use

IMPORTANT: Shake Well Before Diluting

Oil-Away™ Insecticide can be used as a light summer oil applied directly to foliage or other plant parts or as a dormant oil applied to the trunk and bark of perennial fruit, shade and ornamental trees and shrubs.

Oil-Away™ Insecticide is effective against adelgids, aphids, leafhopper nymphs, mealybugs, mites, plant bug nymphs, psyllids, sawfly larvae, scale, thrips, and whitefly. This vegetable oil product will kill eggs and early stage nymphs and caterpillars and sawflies.

Oil-Away™ Insecticide is formulated as a concentrate. It is intended to be used in hand sprayers or pressurized sprayers after being diluted with tap water. One pint of Oil-Away™ Insecticide will make a total of 6.25 gallons of summer spray mixture and over 3 gallons of dormant oil mixture when diluted properly.

Peel back for Mixing
Directions and Storage and
Disposal Instructions.

Mixing Directions: Measure **Oil-Away™ Insecticide** according to the tables below, into a suitable mixing or spraying container, and mix well with one gallon of water.

For best results, please use the spray mixture at the time of mixing. Do not retain the mixed solution for a prolonged period before application.

Pesticidal oils kill insect pests by direct contact and must be applied with good coverage. This requires careful spraying into the center and underneath side of plant foliage. Repeated applications usually lead to improved performance of the spray.

There are thousands of cultivars and species of plants, so always conduct a test spray for plant sensitivity prior to making a full-scale application. We have not observed plant damage in any of the plant species that we have selected for experimental evaluation. These tests included most common vegetable, garden, ornamental, and shade plants.

Oil-Away™ Insecticide can be used as both a light summer oil and a dormant oil. This product is effective against almost all pests for which petroleum oils are recommended. The mode of action is the same and the application methods are the same.

LIGHT SUMMER OIL Application Rate and Controlled Pests		
Crop	Pest	Dosage
Vegetable crops	aphids, scale, whitefly	6 tablespoons (3 oz.) per gallon of water
Ornamental perennials	aphids, scale, mealybugs, whitefly, psocids	6 tablespoons (3 oz.) per gallon of water
Roses	aphids, whitefly, thrips, sawfly larvae	6 tablespoons (3 oz.) per gallon of water

DORMANT OIL Application Rate and Controlled Pests		
<i>Apply when temperatures are not likely to drop below 45°F for 24 hours</i>		
Crop	Pest	Dosage
Ornamental perennials	aphids, scale, mealybugs, whitefly, psocids	12 tablespoons (6 oz.) per gallon of water
Shade and fruit trees	mites, aphids, scale, mealybugs, psocids, adelgids	12 tablespoons (6 oz.) per gallon of water
