

GROW TUB® Strawberry Tower™

US Patent No. 9,253,949

3 ½ gallon container

12" x 12" x 20"

Holds approximately 32 quarts of soil media

Designed by Horticulturalists at Gardens Alive!®
gardensalive.com

#70320
Made in China

Instructions

Ensure sides of tub stay upright while filling with growing media of your choice. For best results, fill to 1½–2" from top of tub. Due to the shape of Grow Tub® Strawberry Tower™, it is best to mix an all-natural fertilizer in with the soil media before filling. Moisten media before planting. Starting from the bottom, place a plant in each of the precut holes. Make sure all the roots are tucked into the media and the growing plant is on the outside of the bag. Continue to next level until all 16 holes are filled. You can add one or two more plants on the top of the tub. Water thoroughly, making certain water is reaching the bottom of the tub. Because Grow Tub® Strawberry Tower™ is made with porous material, there's no such thing as too much water!

Once the season is over, remove growing media and allow the tub to dry. Simply fold and store for winter— Grow Tub® Strawberry Tower™ can be reused for several years! Depending on your grow zone, you may want to overwinter your perennial plantings in an unheated garage or other protective structure.

Grow Tub® Strawberry Tower™ can be placed directly into existing gardens and beds, but is ideally suited for apartment balconies, decks, porches or patios.

GROW TUB®

Strawberry Tower™

- Patented design optimizes berry production and plant growth by maximizing sun/leaf contact
- Ideal for limited garden space—great for apartment balconies, decks, porches or patios
- Elevated plants are easier to harvest—typically no weeding required
- Create an instant garden for strawberries, herbs, vegetables and annual flowers
- Plant multiple varieties in a single container—holds up to 18 plants
- Once season is over, simply remove contents and fold flat for easy storage
- Made from heavy-duty, non-woven geotextiles with reinforced seams and two handles for easy repositioning
