# Dried Bat Guano

## All-Natural Fertilizer (7-3-1)

Quickly releases nitrogen into the soil while also providing needed phosphorous and potassium. Ideal for plants that are heavy feeders and need a nitrogen boost.

### APPLICATION INSTRUCTIONS

#### New plantings:

- Apply 1-2 tsp. per 1 gal. of soil.

#### Transplants:

- Apply 1-2 tsp. per hole.

#### Existing plantings:

- Apply 1-2 lbs. per 100 sq ft.

Gardeners report that Dried Bat Guano increases the sweetness and flavor of edible plant parts while also helping with disease resistance.

While Dried Bat Guano quickly delivers nitrogen, it does not burn the plants like some synthetic fertilizers have been known to do. Like other natural plant foods, Dried Bat Guano does not leach out of your soil easily—and improves your soil structure and health. Best of all, bat guano is a renewable resource and requires no mining.

### GUARANTEED ANALYSIS

Total Nitrogen (N) . . . . . 7%  
 2% Water-Soluble Nitrogen  
 5% Water-Insoluble Nitrogen\*
