# All Purpose Pest Away<sup>TM</sup> Trap

Ready to use anywhere!  
Non-Toxic. Long-Lasting. Pesticide-Free!

Traps grain moths, flour moths, meal moths, seed moths  
& Flour Beetles!

## All Purpose Pest Away<sup>TM</sup> Trap

### Your Kit Includes:

- 2 Traps
- 2 Pheromone Lures

All Purpose Pest Away<sup>TM</sup> Trap uses a powerful attractant (Pheromone) that has a strong effect on certain moths & flour beetles. It has been used in commercial pest management to trap a variety of moths & beetles. These include many different species: Indian meal moths, seed moths, raisin moths, almond moths, tobacco moths and flour beetles.

These pests are found world-wide around dried goods and foods, including: wheat, cornmeal, dried fruits, seeds, crackers, biscuits, nuts, powdered milk, dried pet food, bird seed, chocolate, red peppers, tobacco and cocoa beans.

### How to Assemble:

Remove the cover paper from the pre-glued trap. Open the lure pack and place the lure near the center of the glued area of the trap. Assemble the trap with the glued surface inside by pushing the tab at one end into the slot in the other end of the trap.

### Trap Placement:

Place the trap near the problem area, generally where dried foodstuffs are stored. Locations include the basement, pantry, kitchen or garage. Choose a location where the trap will get the most air circulation, but where it will not be damaged by swinging doors or food traffic. The moths will find the trap when the trap is placed within 10 feet of the infested food source. Do not put more than 1 trap per room.

### To Remove And Dispose:

The lure should last at least 8-10 weeks. Check trap often to determine if it is full or dirty. Discard when full. To discard, wrap in newspaper and dispose in household garbage.

**CAUTION: KEEP OUT OF REACH OF CHILDREN**
