

#12703: Mini-Seedmaster®

The Mini-Seedmaster® is designed to ease your planting of small seeds, cutting back or eliminating thinning. The Mini-Seedmaster® may be used directly in garden soil, trays and pots.

To use your Mini-Seedmaster®,

- 1) Twist and gently pull bullet shaped lip off of the seeder.
- 2) Pour seed into the base of the seeder. For best results, please do not exceed one full pack of seeds at a time.
- 3) Twist and gently push the tip of the seeder back into place.
- 4) Make sure tip of the seeder is completely seated on its base.
- 5) Hold the seeder at about a 45° angle over your prepared soil.
- 6) With your middle and index fingers on the underside of the base flange, gently push the wider plunger top, this action releases the seeds one to two at a time.

We can not list all of the seeds with which the Mini-Seedmaster® is most helpful! Some of the most popular include:

Flowers: Ageratum, Alyssum, Aralia, Aster, Baby Breath, Begonia, Brawallia, Cactus, Calceolaria, Canterbury Bells, Chrysanthemum, Cineraria, Coleus, Dianthus, Dusty Miller, Heuchera, Hypoestes, Impatiens, Lobelia, Nicotinia, Petunia, Moss Rose, Pansy, Phlox, Poppy, Portulaca, Salvia, Sedum, Shasta Daisy, Snapdragon, Stook, Sweet William, Veronica, Vinca, Viola.

Vegetables: Broccoli, Brussels Sprout, Cabbage, Cauliflower, Celery, Chive, Dill, Lettuce, Mustard, Parsley, Radish, Rutabaga, Tomato, Turnip.
