Heavenly Scented™
Hybrid Tea • cv. WEKvodomer • PPAF

Heavenly Scented Hybrid Tea Rose has everything you desire from a long stemmed rose, delivered in a beautiful conch pink. Hybrid teas are known to produce one large flower per stem, making them the quintessential cutting rose. The strong, sweet fragrance beloved by rose gardeners travels with each cut flower. In the garden, Heavenly Scented grows in an upright habit and has a strong resistance to downy mildew and rust. Good color retention means that these roses won’t lose their bright prawn-pink hue in the sun.

Morning Glow™
Floribunda • cv. WEKpiflaspas • PPAF

Wake up to a brand new morning with this fresh Floribunda. Our Morning Glow Floribunda rose combines dark green foliage, outstanding bud form, and large, nearly 4” across, old-fashioned blooms in a silky ginger-root yellow. That gorgeous contrast, along with its light tea fragrance, will set Morning Glow apart from all the other roses in your garden. Floribunda roses are defined by their large, full clusters of flowers and this new variety is no exception, with romantic sunrise colors in large, bowl-shaped blooms. Excellent color retention and strong disease resistance.

**Picture Perfect™**  
*Hybrid Tea • cv. WEKmamoprela • PPAF*

A classic Hybrid Tea with eye-catching hot pink petals, made more striking by solid cream color on the reverse of each petal. The cream reverse color really makes the hot pink “jump” out. Elegant flowers with shapely pointed, spiraling buds. A true Hybrid Tea with one long-stem per flower, makes Picture Perfect “perfect” for stunning bouquets. Re-blooms throughout the season, so you can bring the beauty inside for bouquets all summer long! Large double flowers hold their vivid color until the petals drop. As the petals drop, they will sprinkle hot pink petals on the ground for an extra visual attraction. Mature petals drop leaving a clean appearance, rather than turning brown and holding on the stem as many older varieties do.

**Flower Color:** Fuchsia pink with white reverse  
**Height/Habit:** Medium-tall/Upright moderately spreading  
**Bloom/Size:** Spiraled, elegant & double/Large, around 4.5 inch diameter, single (30 to 40 petals)

**Sultry Night™**  
*Shrub • cv. WEKswipufste • PPAF*

Sultry Night Shrub Rose features large flowers in magenta pink with hints of blue. Each petal has a lighter reverse, adding a mystical shine to this shrub rose and an unforgettable heat to the garden. While the flower size of this shrub rose is smaller than the bloom size of Floribunda roses, clusters of eight to fifteen large blooms open at once for a fairytale display of color. Resistant to powdery mildew and rust, this magical rose shrub will have you spellbound.

**Flower Color:** Magenta fading magenta-purple with lighter reverse  
**Height/Habit:** Medium-small/Bushy rounded  
**Bloom/Size:** Old-fashioned, cuppy & very double/ Medium, around 3 inch diameter, in medium sized clusters (60 to 100 petals)

Diamond Eyes™

Patio • cv. WEKwibypur • Pat.#26,202

Mysteriously novel black-purple flowers with a strong clove spice perfume. That’s a killer combo that will seduce even regular rose lovers to try this little gem. Her sparkling white ‘eye’ lights up each velvety blossom, making the unique color illuminate against the background of glossy green leaves. Tucks easily into any landscape—but also makes a striking conversation piece in a decorative pot or as an 18” tree. Darkens up in cooler conditions.

**Flower Color:** Black-purple/White ‘eye’

Uptown Girl™

Grandiflora • cv. WEKabacima • PPAF

As sweet and fashionable as its namesake, Uptown Girl is a must-have for a showy backyard garden or set in front of a bay window. An old-fashioned style rose, Uptown Girl blooms with the “quartered” look typical of English roses. Its petals are tucked into a cup shape, in serried ranks with a scalloped appearance. Medium-sized, coral-pink flowers feature a darker reverse and outstanding color retention. If you haven’t tried grandifloras, this is a great beginner’s rose, thanks to its resistance to rust, powdery mildew, and downy mildew. Grandiflora roses are a combination of hybrid teas married with floribundas, and achieve the graceful blooms of a tea with the hardiness and zeal of the floribunda.

**Flower Color:** Warm coral pink with a deeper orange-toned interior

**Height/Habit:** Medium/Rounded & bushy

**Bloom/Size:** Old-fashioned, spiraled & fully double/ Medium-large, around 3½-4½ inch diameter, mostly single (70 to 90 petals)

Anna’s Promise®
Grandiflora • cv. WEKdoofat • Pat.#27,865

With a ‘dad’ like the AARS winner About Face, you can only expect the new rose ‘kid’ to be GREAT. The ‘kid’ inherited the novel golden tan with copper reverse flower colors of ‘dad’ but the ‘son’ has larger flowers and improved flower form. The sweet & spicy, fruity fragrance will freshen up your garden. It’s like having a basket full of juicy grapefruit and freshly sliced apples under your nose! Also stunning as a centerpiece bouquet. The new vigorous and prolific bloomer rose ‘baby’ is well clothed with clean deep glossy green foliage. Blooms prolifically throughout the growing season.

Full Sail
Hybrid Tea

Seems that fragrance in white roses has somehow been an elusive combination. So when the wonderfully scented New Zealand produced a white color sport (mutation), it was a welcome surprise. Other than color, it’s got all the great qualities of “Mom”—great glossy foliage, beautiful flower form, etc. But best of all, it’s got that heady honeysuckle perfume that’ll make you swoon with just one sniff. Opens best when temps are consistent. Best flower size when cool.

**Flower Color:** Bright white

Fun in the Sun™
Grandiflora • cv. WEKpupmobalip • PPAF

This new Grandiflora maintains its color to the end and provides a delightfully intense, fruity scent, inviting butterflies and other pollinators to the garden. It’s a true English-style rose that contains 60-85 petals in each of its 3-4” flower heads, appearing in clusters of 5 or 6 blooms per stem. True to its name, Fun in the Sun thrives in full sun with thorough watering early in the day. It’s perfect for bringing a sophisticated ambiance to border gardens. We love it as an eye-catching focal point in bouquets and vases, too.

Flower Color: Gold suffused with pink
Height/Habit: Medium/Upright
Bloom/Size: Old-fashioned, cuppy & very double/ Medium-large, 3-4” diameter, in small clusters. (60 to 85 petals)
Fragrance: Strong fruity & spices

Available As: 1) Budded, Bareroot 2) Leaf N’ Bud® #3 Container 3) Tops In Pots™ Dormant Potted 4) 36” Tree Bareroot 5) 36” Tree #5 Container

Gold Medal
Grandiflora

Here’s a yellow that stands in defiance against the climatic throes of Mother Nature. The very vigorous plant gives a nearly constant supply of shapely dark gold buds brushed with orange and deep golden yellow flowers. The long stems are low-thorned and clothed with large very resistant deep green foliage. Deeper color in moderate climates.

Flower Color: Golden yellow suffused orange
Height/Habit: Very tall/Upright
Bloom/Size: Medium-large, double (30 to 35 petals)
Re-Bloomer: Repeat blooms throughout season
Fragrance: None

**Good as Gold**

*Grandiflora • cv. WEKgobafa • Pat. #26,170*

Some might say “orange”, some “gold”, some “amber” or maybe it is even double-dipped “yellow”. However your eyeballs perceive it, we can guarantee it is bold & beautiful, especially with the kiss of red on the finish. This handsome bushy bouquet machine will fill your garden with loads of long-stemmed lovelies clothed with a clean gown of rich green. Certainly not for the faint of heart...nor for the lovers of pastels, she'll make a big bold statement in the landscape. An attention grabber...deluxe!

**Flower Color:** Deep golden orange-yellow finished with a kiss of red

**Happy Go Lucky™**
*Grandiflora • cv. WEKsirjuci • Pat.#26,170*

BIG fragrant & full old-fashioned blossoms of pure yellow have all the charm of an English rose but born on this side of the pond. Yet it easily bests the disease resistance of any English variety hands down retaining its gown of rich green foliage. The vigorous bushy plant flowers like a fool well into the season without turning into a sprawling stingy space-eater in the landscape. With a bloodline like this, you know it’s gotta be good.

**Flower Color:** Even pure yellow  
**Height/Habit:** Medium-tall/Upright to somewhat rounded, very bushy

*Hybrid Tea • cv. WEKearman • Pat.#17,821*

Many think the pinnacle of rosedom is a long stemmed red Hybrid Tea with scrumptious big buds. But ponder the thought a little farther to include impeccable flower form & great vase life. Now you’re getting the idea of *Let Freedom Ring*. This striking trophy-stealer was lovingly created by WWII veteran & amateur hybridizer, Ernest Earman of Virginia. More red in cool conditions. Fantastic year-round form.

Legends™
Hybrid Tea • cv. WEKsiamia • Pat.#21,816

Monstrous buds & humungous blossoms of rich ruby red hold their durable brilliance from beginning to end. Immense petals (just one can cover a child’s palm) lend a classical Hybrid Tea bud shape, slowly spiraling open to a ruffled whopper of a show-stopper. Large lettuce-like leaves of an unusual red-green color gracefully enrobe the long cutting stems—in perfect proportion to the flower. Most massive in the spring.

**Flower Color:** Ruby red

**Love at First Sight™**

_Hybrid Tea • cv. WEKmedatasy • PPAF_

This variety is not your grandma’s old Hybrid Tea. It has improved qualities such as vigorous upright yet compact well-balanced habit with abundant large glossy disease resistant foliage, great for mixing with other plants in the landscape or to grow in a pot. It’s hard not to fall in love with the abundance of well-formed red & white bicolor flowers. The love for these flowers goes on and on as the medium red coloration lasts until the petals drop. The medium-long length stems with rounded, globular and very full of petals flowers of _Love at First Sight_ are perfect for a trendy bouquet that can be used to spread the love to friends and family. So, are you in love yet?

Parade Day™
Grandiflora • cv. WEKmeroro • Pat.#28,990

Remember the excitement of lining up in the street as a child to see a parade? Well, we took care of bringing this joy into your garden with the rose Parade Day. The swirl of bright white and fuchsia pink novel coloration brings to mind the movements of the floats. And don’t worry - the show will not be over soon as the flower color holds until the petals drops. Just as fond childhood memories include both sights and smells, Parade Day blooms profusely with elegant buds and flowers accompanied by a very pleasant strong citrus-like fragrance with hints of spices. The petals of each bud are perfectly organized like a well-synchronized marching band. The rhythm created is enhanced with attractive large foliage on a well-covered vigorous plant. Now, let’s bring family and friends into the garden to enjoy the performance!

**Flower Color:** Fuchsia pink striped with bright white

Pink Peace

Hybrid Tea

This derivative of *Peace* had great aspirations to match the fame of its parent. It never quite made it that far, but it’s certainly a splendid pink rose. The rounded vigorous bush produces large shapely lustrous clear pink flowers with a sweet fragrance and deep green foliage. Performance improves with warmer temperatures.

Unlike most striped roses, which typically feature red blooms with light yellow striping, the flowers of this unique variety are pastel pink with stripes that are deeper yellow. As a non-clustering Grandiflora, its lush flowers grow one to a stem, not together in bunches. You’ll appreciate how the glossy foliage sets off the blooms so well. Pop Art offers long-lasting colors, a moderately fruity scent, and very strong resistance to diseases such as Rust and Powdery Mildew.

**Flower Color:** Pink & yellow striped

Smokin’ Hot™
Hybrid Tea • cv. WEKmopaga • PPAF

This rose is the proof of the old adage ‘there’s no smoke without fire’. You can clearly see the smoky purple overlay on the fiery orange petals of Smokin’ Hot. Quite unique! Bring the fire indoors with an attractive bouquet of these novel flowers produced singly on long stems. The plant is a bouquet factory and the flowers will look gorgeous on the table or on the fireplace mantel. But don’t worry, you won’t burn yourself! This rose isn’t just all about flames and smoke. The combustion is cooled down by the glossy medium green background foliage. And just like ‘smoke rises’, so does this upright and very vigorous bush.

**Flower Color:** Dark orange overlaid with purple smoke with white reverse

**Height/Habit:** Tall/Upright to slightly spreading

**Bloom/Size:** Spiraled & double/Medium-large, around 3½-4 inch diameter (25 to 30 petals)

State of Grace™  
Grandiflora • cv. WEKspodotogi • PPAF

State of Grace exemplifies the improved modern antique style. The stylish, attractive old-fashioned soft apricot-gold blossoms with a dark pink reverse are as beautiful in the garden as in a vase. The old-rose romance, style and fragrance was maintained but we improved the disease-resistance and ensured the plant is very well-balanced with a rounded even habit that is not too tall and rangy so you can still enjoy the prolifically produced blooms at eye level.

**Flower Color:** Soft apricot-gold with dark pink reverse

**Arctic Blue™**  
*Floribunda • cv. WEKblufytirar • PPAP*

The tons of lilac pink blossoms of the Arctic Blue rose are like a cold arctic breeze coming to your garden. The cool tones are chilled by the unique lavender blue finish and iced with cream on the reverse of the petals. The flowers hold up well, even in high heat. The very shapely flower buds open slowly, as if they were frozen in time at their most beautiful stage for longer enjoyment; the blooms are attractive to the very end when the opened flowers let go of their petals, showering the ground in iced lavender blue snow. The drought tolerant, vigorous plant is dressed with a glossy green winter jacket of leaves, isolating and protecting the upright bush from mother nature’s diseases, allowing the plant to produce a nonstop snow storm of flowers.

- **Flower Color:** Lilac pink fading lavender blue with cream reverse
- **Height/Habit:** Medium-tall/Upright moderate spreader
- **Bloom/Size:** Medium, 3-4” diameter, medium sized clusters (25 to 40 petals)/Spiraled, shapely & double

Belinda’s Dream
Shrub/Floribunda

No, you’re not hallucinating...a rose that truly resists black spot is no longer just a pipe dream. This pretty-in-pink hybrid battles the dreaded fungus with amazing ease, keeping its medium green leaves all season long – from the top to the bottom of its bushy plant. Shapely buds open to fully double old-fashioned flowers. Thrives best in hot humid summers. Requires hot nights. Black spot free.

**Brilliant Pink Iceberg**
Floribunda • cv. PRObril • Pat.#12,645

This color mutation of the renowned Iceberg hails from Tasmania. The plant is exactly like its parent in every way but color–same great landscape value, free flowering habit, foliage, flower form & showy clusters. It’s just that the color has been kicked up a notch to a bright cerise pink painted onto cream. Color intensifies in cooler conditions.

Celestial Night™
Floribunda • cv. WEKebtigrad • PPAF

A telescope is no longer required to view the dark purple shades of a galaxy from your own backyard - you can see them with your own eyes when admiring the mystical colored flowers of Celestial Night. The out of this world deep plum purple is the most challenging color to attain in the rose breeding world. Combining disease resistance and vigor to that coloration makes it almost a supernatural achievement! Long lasting color holds until petals fall off. This heavenly rose also reaches for the stars when it comes to flowering performance. If you’re a fan of this color, look no further as Celestial Night is sky high above the competition, making it the very best of its kind!

**Cinco de Mayo™**  
*Floribunda • cv. WEKcobeju • Pat.#21,709*

The clusters of blooms never stop poppin’ open on this powerfully flowerful Floribunda. Mysteriously colored & deliriously novel...it’s an indescribable blending of smoked lavender & rusty red-orange. Yet it’s perfectly blendable with any color in the garden, whether it’s atop a rose tree, planted in mass or nestled amongst your favorite perennials. The super-clean glossy-green foliage mirrors the flowers, adding even more pizazz to this bushy rounded flower factory. Smokier when it’s cool outside.

**Frida Kahlo®**  
*Floribunda • cv. WEKcifrabaun • PPAF*

As an emblematic artist of Mexico, world-acclaimed painter Frida Kahlo needs no further introduction. She once said “I paint flowers so they will not die.” Like the flowers she immortalized in her art, the rose *Frida Kahlo* is a lively and colorful reminder of her enduring spirit. Just as Frida is one of the most recognizable artists for her unique style, the scarlet red and gold striped flowers of *Frida Kahlo* are also one of a kind in the rose world. The swirl of colors intensifies as the flowers age, adding a red blush as the final touch. Like any painting needs a good stand, the flowers are set in small clusters on a healthy disease resistant plant with clean glossy leaves. If you are one of Frida’s followers or simply a rose lover, join the Fridamania by adding a piece of art to your garden with the striking vibrant rounded flowers produced abundantly on the compact upright vigorous plants.

George Burns
Floribunda • cv. WEKcalroc • Pat.#10,334

Just the array of novel colors in every flower can bring a smile to your face...although maybe not as many smiles as its namesake, the late George Burns. But it’s a definite ‘feel-good’ rose; bright cheery ever-changing colors of yellow, deep red, rose-pink and cream, big fragrant ruffled flowers, large clean deep glossy green foliage and a fairly compact yet free-flowing plant. More yellow shows up in moderate cool temperatures.

- **Flower Color:** Yellow, red, pink & cream striped
- **Height/Habit:** Medium-low/Rounded
- **Bloom/Size:** Large, double & decorative (30 to 35 petals)
- **Re-Bloomer:** Repeat blooms throughout season
- **Fragrance:** Moderate fruit & citrus

*Floribunda • cv. WEKpaltlez • Pat.#15,155*

Mysterious, indescribable, elusive...whatever! There’s just no other rose color quite like this. Pointed buds of deep rust unfurl to reveal a chocolate haze of velvety smoked tones that can even take on a purply cast. Set against gobs of glossy foliage, the ruffled fragrant flowers are mirrored by super-green leaves. Easy vigor and natural disease-resistance make it a must for every garden. Keeps on smokin’ even when the weather turns warm.

Julia Child
Floribunda • cv. WEKvossutono • Pat.#18,473

Just before our wonderful American icon left us, she selected this exceptional rose to bear her name. Julia loved the even butter gold color & the licorice candy fragrance. The perfectly rounded habit, super glossy leaves & great disease resistance finish off the dish. Consistent, hardy and floriferous in all climates. Very disease resistant. During warm, humid conditions, Blackspot will cause some leaf defoliation, but Julia Child tolerates disease very well and continues to bloom in spite of leaf damage.

- **Flower Color:** Butter gold

Jump for Joy™
Floribunda • cv. WEKnewchi • Pat.#26,819

Lusciously lovely, delectable peachy-pink color sets apart this sister seedling of Sparkle & Shine. They may have their differences (peach pink vs. deep yellow). But, like most sisters, they share some likenesses, too. Both are distinctive because of their large showy clusters, long-lived flowers with lovely color, round bushy super-flowerful habit, loads of glossy green leaves & consistent dark red new growth. Buy ’em both & let these sisters battle it out for who’s the best in your garden.

Slap a layer of the brightest red onto a backside of darkest yellow & set it atop the greeniest glossiest leaves. Better yet, the flowers hold on to their attention-getting tones to the very end...dropping from the well-behaved rounded plant just in time to welcome the next round of abundant bloom. Tidy enough to tuck into a landscape, lend an accent to a container or top a rose tree. No buns or weenies required. Best flower size in cooler conditions. Bold & beautiful!

So unusual…it looks good enough to eat…or maybe drink in this case. You just can’t imagine a milky chocolate-colored bud would mature to be a solid soft lavender blossom. Early to bloom, every lovely bud spirals open with impeccable show form. The flowers last long on the plant & in the vase. Beyond its novelty, there lies a great plant….rounded, handsome & bushy...chock full of green leaves. Warm weather brings out the lavender.

Life of the Party™
Floribunda ∙ cv. WEKjucistwe ∙ PPAF ∙ Huntington’s 100th

You know the fun is going to begin when the life of the party arrives! The rose *Life of the Party* is sure to entertain you in the garden as this blooming machine is a party animal when it comes to flower production. The cuppy yellow old-fashioned flowers are kissed with a pink blush when the party is over, but not too early, keeping the coloration until the petals drop. If you are too shy to invite your neighbors for a garden party, don’t worry as the strong fruity smell that EXUDES from its flowers will serve as a formal invitation and attract people from far away! The long lasting blossoms are enthusiastically produced in medium sized clusters on top of an upright & bushy plant. The clean dark glossy green leaves are feeding the flower production by generating the needed energy so the party can go on and on and on!

**Flower Color:** Yellow kissed with pink on finish

This is the red that Americans love...deep, velvety, bright, and long-lasting...it’s just right. Better yet, that color comes in great clusters of ruffled flowers showing off against the backdrop of glossy dark red-green leaves with very good tolerance of Rust and Powdery Mildew. The bushy full plant could be used as a flowerful hedge, a showy mass planting or just by itself...a red beacon for the American garden. Cooler temps bring out the best flower form.

A color so scrumptious, it looks good enough to eat...and you certainly can if you watch out for the thorns. But it may not be the sticky sweet treat you’d expect for the delectable pumpkin-pie caramel color. Buttery- rich coppery buds open into clusters of orange beauties held tightly against shiny green leaves—like happy jack o’lanterns nestled in the field. It’s lip-smackin’ for the landscape and certain to delight on the very first flower. Appreciates a little afternoon shade.

Queen of Elegance™

cv. WEKjucstokol • PPAF • Floribunda

How would you feel about adding a touch of royalty to your garden? Roses are already known as the queen of the flower world but with **Queen of Elegance** you are getting multi-petaled, old-fashioned medium pink and large flowers worthy of a monarch! The blooms are certainly sophisticated and elegant but the strong rose perfume is what make this variety deserving of belonging to the aristocracy. Each long-lasting and non-fading blossom invites you to bury your nose to inhale the perfume of ‘old time’ roses of your dreams. Her eminence is also an excellent garden variety as the upright vigorous plant is robed with glossy dark green foliage, holding the refined blooms at the right height for your satisfaction.

**Rosie the Riveter™**

*Floribunda • cv. WEKzazou • PPAF*

*Rosie the Riveter* pays tribute to the women who worked in factories and shipyards during World War II. The old-fashioned unusual flowers of orangey-gold suffused with pink are surely reminiscent of that era. The exquisite pointy and shapely buds are proudly held on top of very glossy dark foliage as a feminine symbol of charm and strength. A flower representing a women's cultural icon without fragrance would not work. The moderate fruity & spice fragrance is the perfect complement. Like the tirelessRosies, the even rounded plants of *Rosie the Riveter* are the workhorse of the garden, producing an arsenal of flowers. Maximum flower power?

Silver Lining™
Floribunda • cv. WEKcrypeplos • PPAF

The glamour of the silver screen comes to life in this modern rose. This 2021 introduction has a mild tea fragrance and a classical shape. Silver Lining blossoms throughout the summer and into early fall, producing glamorous, spiraled silver-lavender blooms. Its bushy, deep green foliage maintains a stunning glossiness and a moderate spread. This Floribunda offers good disease resistance and attracts pollinators and butterflies. A new rose with classic beauty, Silver Lining is perfect for adding to a new or established rose garden, or for including a touch of romance to a sunny border or bed.

Violet’s Pride™
Floribunda • cv. WEKwibysicpep • PPAF

Violet’s Pride undeniably belongs to the aristocracy of the rose world with dense foliage, resilience from diseases and a sophisticated grapefruit and fruit-like fragrance worthy of any noblewoman. The exquisite lavender blooms unfold to display a spectacular magenta-colored heart on the inner petals. This prolific blooming rose generates some of the most elegant buds and flowers that are worthy of first prize in any Best of Show contest. The flowers are held proudly on top of a vigorous and even rounded bush.

White Licorice™
Floribunda • cv. WEKdidusinra • Pat. #22,540

This quiet color packs a powerful punch of unparalleled perfume… a sweet licorice & lemon blossom aroma that will make you tingle with delight. A bouquet-making machine-of-a-plant with wonderfully formed buds that open into big wavy wonders set atop sturdy stems clothed with dark green leaves. Bushy & beautifully branched, the plant looks as good in the garden as the flowers do in a vase. More yellow when cool...more white when warm.

Rugosa Roses

*Rosa rugosa* are species roses that are native to Asia and southeastern Siberia. The word “rugosa” is Latin for “wrinkled,” which accurately describes the foliage texture of this hardy rose. Rugosas are disease resistant and need little maintenance. They are frequently used in mass highway plantings and along coastal areas where their tolerance to deicing salt and seaside salt spray make them a tough, colorful trouble-free landscape plant. Rugosas also provide seasonal interest with their colorful fall hips.

Foetida Roses

*Rosa foetida* are species roses that are native to the foothills of the Caucasus Mountains in Georgia. It is noted for its tough disposition and bringing bright colors to harsh climates. Prior to *Rosa foetida*‘s introduction, the color yellow was not found in native European roses. All modern day rose hybrids owe their sunny colors to their *Rosa foetida* family members. Although the word “foetida” is Latin for “having a bad smell,” you will find members. Although the word “foetida” is Latin for “having a bad smell,” you will find

**Austrian Copper**

*Foetida • Rosa foetida bicolor*

Old-fashioned clusters of single-petaled flowers with a blinding color can literally cover this tough shrubby species rose. Its natural hardiness and brilliant color make it popular in harsher climates. Grows vigorously and brilliantly color make it popular in

**Blanc Double de Coubert**

*Rugosa*

A beloved member of the Rugosa species because of the nearly continual production of pure white large double flowers saturated with fragrance. Red hips ripen in the fall. Large, orange-red hips add fall and winter interest and wildlife food. Tough, hardy & naturally disease resistant. Avoid chemical sprays.

**Frau Dagmar Hartopp**

*Rugosa • Dagmar Hastrup, Frau Dagmar Hastrup*

This renowned international rose is the most compact grower in the rugosa species. This very dwarf wonderfully hardy shrub produces a profusion of shimmering light pink single flowers for your pleasure. A good addition to a small or large landscape that demands very little work. Attractive fall color and red hips in the fall. Drought resistant

**Hansa**

*Rugosa*

All the good, rugged features of the Rugosa species are combined with big shapely buds and richly-colored fragrant flowers in this old hardy favorite. Great for barrier plantings in cold climates. Attractive fall color and red hips in the fall. Avoid chemical sprays. Drought resistant. Disease free.

**Linda Campbell**

*Rugosa*

*A 'new' rose named to honor the late great friend of the rose from Denver. New because of its large clusters of flowers with strong red color. Old because of its Rugosa heritage—naturally hardy with quilted grey-green foliage. Very good repeat bloom. Give her room to show off. Loves heat best.

Ownroot Patio Bushes

Patio Roses are just the right roses to fill that extra special small garden space or decorative pot on a balcony or patio. Patio Roses were hybridized as garden roses so they are excellent garden performers, not your typical super-market miniature! Imagine a compact and floriferous bloomer, many of which display small Hybrid Tea like flowers with the whole plant (size of canes, height, foliage, flower) in proportion.

Children's Hope™
Small Shrub • cv. WEKswegobab • PPAF

With each sale of the Children’s Hope rose, a portion of the proceeds goes back to the Children’s Brain Tumor Foundation who’s mission is to get children with brain tumors and spinal cord injuries back to good health. Each little medium red pom pom-like flower is produced in big clusters on a perfectly even rounded plant. Ideal for a smaller spot in the landscape or as a focal point in a decorative pot. Children's Hope has shown excellent performance in most climates of the country.

Patio Climbers

Patio Climbers are smaller versions of our full-sized climbers but in perfect proportion. Perfect for that small space in the garden or decorative pot on a balcony or patio. An excellent choice to fill a small vertical space with vibrant color. Patio Climbers were also hybridized as garden roses so they are excellent garden performers as well.

18" & 24" Patio Tree Roses

18" Patio Trees are produced by budding our popular Patio rose and small Shrub varieties onto an 18" Dr. Huey trunk.

24" Patio Trees use Floribunda and Shrub varieties budded onto a 24" trunk. 18" and 24" Patio Trees can fulfill your need for formal landscape accents in smaller spaces. Create special colorful containers by surrounding the trunk with flowering annuals.

How to Choose the Best Products for Your Rose Program

Patented vs. Non-Patented Roses

**Patented Roses:**
Weeks Roses is the recognized leader in hybridizing garden roses. Roses of merit are brought to commerce after a lengthy evaluation process across the US. Natural disease resistance is a priority and the roses are evaluated in a 'no spray' environment.

Rose breeders only patent the best roses with truly unique qualities. Once a plant patent is issued, it lasts 20 years before it expires.

Patented roses represent the latest, greatest selections from Weeks Roses and represents over 100 years' worth of rose breeding experience, which means that each generation of new rose hybrids is building from the best qualities and features of the previous one.

During this 20 year patented status, patented roses are protected from unlicensed asexual reproduction by the U.S. Plant Patent Act.

Through the years, bloom form has improved and bloom cycles have been minimized. This translates into more color! Old roses such as **Chrysler Imperial** have 60-day bloom cycles, which means that you’ll have periods of bloom-less plants while awaiting new buds.

Newer patented Hybrid Teas, such as **Pretty Lady Rose** and **All My Loving**, have been bred with 45-day bloom cycles, which will ensure that your rose plant is always in bloom. With today’s roses, you’ll be able to choose from a wide variety of beautiful colors and intoxicating fragrances.

Modern roses have been bred with greater vigor and improved growth habits. They are also vastly more disease resistant than roses of old. And as groundbreaking roses such as **Take It Easy**, **Watercolors Home Run & Top Gun** entered the collective gene pool new Shrub roses requiring little to no maintenance will continue to emerge in the years to come.

**Non-Patented Roses:**
When a rose patent expires, varieties that have 'stood the test of time' are kept in production. What would a rose garden be without **Peace** or **Mr. Lincoln**? Weeks Roses Non-Patents are popular, proven, and have familiar names that gardeners know.

**Budded vs. Ownroot**

Weeks evaluation process determines varieties that will do well ownroot and which must be budded on rootstock to have vigor.

**Budded:**
Budding roses on rootstock such as **Dr. Huey** is the proven method to replicate roses. **Dr. Huey** is a hardy vigorous rootstock that allows a rose to perform to its best potential. Budded roses allows a rose to perform in a wide range of soil moistures and pH.

**Ownroot:**
Many ownroot roses perform especially well in Northern locations where harsh winters can be a concern. In these situations where unusually hard freezes cause dieback, ownroot roses have a better chance of recovering and remaining true to cultivar.

Multiple varieties of Weeks' roses are offered budded as well as 'ownroot'.

**Bareroot Grade # 1 vs. Grade # 1.5**

Weeks Roses harvests over three million roses annually. Following harvest, roses are brought to our sophisticated processing facility where each rose bush and tree is inspected individually and assigned a grade for quality by our experienced processing staff. Each bundle of roses (five per bundle) is labeled with a plastic tag indicating the name and grade.

**Grade #1:**
Our bareroot bush & tree roses. Our premium roses are assigned a Grade #1.

**Grade #1.5:**
While the attempt is to grow the very best quality, Grade #1.5 roses are a step down from Grade #1. Grade #1.5 roses are of value, when availability and lower unit price is a consideration.

It should be noted that a Grade 1.5 rose when properly cared for in a garden situation will over time outgrow its Grade 1.5 status and fully reach its potential.
Minimum Order:
Multiples of 5 Only • Any Combination of:

100 • Bush, Climber, Shrub & Patio Roses
25 • Tree Roses

Product Overview:
• Weeks’ superior #1 & #1½ grade two-year plants have been our mainstay since 1938
• Grown in our own fertile fields in Wasco, CA under the direct supervision of our Director of Field Operations
• You can grow your own large and lush container roses in 8-10 weeks or less or sell them bareroot.

Misc. Information:
• Point of Purchase Materials: POP can help boost your sales and are easily ordered by the order form or customer service.
• Varietal Minimums: Roses are shipped in bundles of five. Rose varietal information is identified by a plastic strip tag placed on each plant.
• Harvest: Bareroot plants are harvested in early winter after the plants have gone dormant to reduce stress.

Shipping:
• Bareroot: Bareroot roses can be picked up at our Wasco warehouse or shipped directly to your location.
• Pick-up Appointment: Please contact the Shipping Department at shipping@weeks-roses.com or your Customer Service Representative for a pick-up appointment.
• Boxed: Roses are wrapped in a protective plastic wrapper and packed in the appropriately sized cardboard box.
• Bulk: Roses are picked up or shipped without plastic & cardboard packing and are stacked by variety directly in the truck.

Fees:
• Boxing Fee: Additional boxing charges do apply.
• Bulk Load Fee: Additional bulk charges of $375.00 do apply.
• Under Minimum: Bareroot orders under the minimum amount are subject to actual freight billing

Bareroot Growing Recommendations
• Pots: Most growers use a three-gallon container, a few use five gallon or larger, especially for tree roses. Two-gallon pots work well for Patios. Make sure pots have adequate drainage.
• Soil Mix: Roses require a heavier mix than bedding plants, but a lighter mix than most nursery stock. The pH should be between 6.0 and 7. Know your pH, lime may be needed to raise the pH. A good commercial media like Fafard’s #52 works very well. A good “home made” mix is: 1/3 composted pine bark, 1/3 peat moss, 1/3 topsoil or (compost). The addition of gypsum (calcium) to the soil mix may benefit by growing stronger canes and a more disease resistant leaf surface. The mix should have no fertilizer added to it. Fertilizing can begin once roses have sprouted (about week 3 or 4).
• Inspect Roses on Arrival: Any problems or abnormalities must be reported to Weeks Roses immediately! Pot as soon as possible. KEEP ROOTS MOIST from the time boxes are opened and throughout the potting process. Roots should be soaked overnight or for at least two hours before potting.
• Pruning: Prune away any broken/ damaged roots, canes, or twiggy growth. Prune canes back to 4-6”. Give roots a light pruning but leave as much as possible without having to wrap roots at the bottom of the container.
• Planting: Plant roses so the bud union is at or slightly below the soil level. Avoid potting in the wind and full sun. A shaded or indoor location is best. Tree roses should be staked.
• Watering: Water in immediately and thoroughly. Follow up with regular watering program. Soil should be kept slightly moist at all times until the roses have sprouted. Successful rose growers apply granular Subdue Maxx at this time.

• Mild Weather: In mild climates, place newly potted roses in a shaded location and, most importantly, shielded from the wind. Keep canes moist by syringing plants several times a day until sprouts appear. Some growers cover the roses with saran or white poly until breaks emerge with very good results.
• Cold Weather: In colder climates, in a greenhouse or cold frame, plants require a very humid environment along with good air movement provided by fans. After shoots are 1” long, humidity should be reduced below 85% if possible. (Make sure to fan ventilate on warm days.)
• Dormant Spray: Before the plants leaf out, apply a dormant spray to coat the canes, soil, pots and ground surface.
• Fertilizing: When the roses have shoots of 2” in length, begin fertilizing at half the recommended rate. Applying fertilizer earlier and/or at higher rates can burn the young roots.
How to Plant a Weeks’ Dormant Potted Rose

Step #1:
Select a location in the garden that best fulfills the requirements given in our Rose Basics.

Step #2:
Dig a hole large enough to easily accommodate the entire fiber pot at the proper height. In cold climates, position the graft knot/crown 2 to 3 inches below ground level. In mild climates, position the graft knot/crown right at ground level. Amend the soil going back into the hole with well-rotted compost.

Step #3:
Remove the plastic bag from around the fiber pot. Prune out any dead or broken canes. With a sharp knife, remove the lip of the fiber pot to the same level as the top of the soil mix inside the pot. Make 3 or 4 six-inch vertical cuts into the sides of the fiber pot at even intervals. For best results, cut the bottom out of the pot to allow new roots to easily penetrate. Take care to not disturb the young roots when working with the fiber pot.

Step #4:
Place the fiber pot and plant at the correct level in the hole (see STEP 2). Fill in the hole with your amended soil. Water slowly and deeply to wet the roots and settle the planting. Some additional amended soil may be required after the plant settles. Do NOT fertilize new plants until the new growth is 4 to 5 inches long.
